

# SafeCase CRBN™

## Daily System Check for iPhone 12

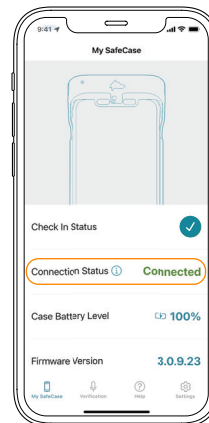

To perform a system check, open the Privoro app and check the following two statuses on the My SafeCase screen:

### CONNECTION STATUS

**Connection Status** should display **Connected**, indicating an active cloud connection.

If **Connection Status** instead displays a red **Please Connect** button, tap the button to reestablish the cloud connection.

**Note** that the Privoro app must continue running in the background to maintain a cloud connection.

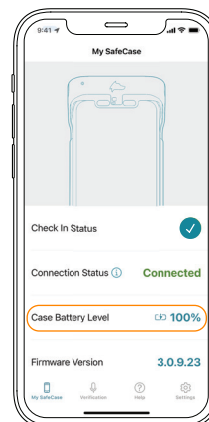

### CASE BATTERY LEVEL

**Case Battery Level** should indicate a sufficient percentage to ensure that your SafeCase CRBN™ (Carbon) will remain powered on for the rest of your day.

If the battery level is too low, charge your SafeCase CRBN using the included two-headed charging cable and a USB power source (computer or power adapter).

**Note** that Case Battery Level displays N/A instead of a percentage in the event that you need to reconnect to the cloud.
