

SafeCase™ iPhone 12

Daily System Check

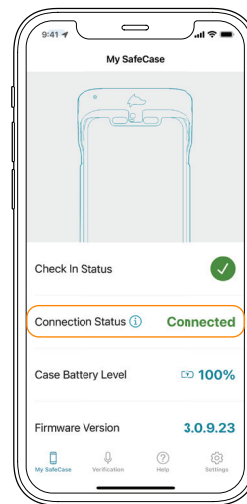

To perform a system check, open the Privoro app and check the following two statuses on the My SafeCase screen:

CONNECTION STATUS

Connection Status should display **Connected**, indicating an active cloud connection.

If **Connection Status** instead displays a red **Please Connect** button, tap the button to reestablish the cloud connection.

Note that the Privoro app must continue running in the background to maintain a cloud connection.

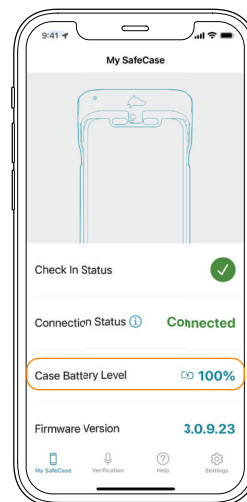

CASE BATTERY LEVEL

Case Battery Level should indicate a sufficient percentage to ensure that your SafeCase will remain powered on for the rest of your day.

If the battery level is too low, charge your SafeCase using the included two-headed charging cable and a USB power source (computer or power adapter).

Note that Case Battery Level displays N/A instead of a percentage in the event that you need to reconnect to the cloud.
